Rolomschrijving en taakafspraken

Introduction

Are you a consultant with a strong interest in complex (high tech) manufacturing environments? Then ASML has a very interesting opportunity for you to help drive ASML's ambitious roadmap.

Job Mission

You are responsible for the translation of business demands into concrete, state-of-the-art IT solutions.

Job Description

As SAP MES consultant you act as a first IT contact (subject matter expert) for Business key players and Business process owners in the ASML organization (Manufacturing departments). Your main activities are related to manufacturing departments of ASML. You assess, change and refine business processes and related information system to continuously increase the effectiveness of the supporting systems and ensure that they are

properly aligned with the company's strategic direction. You will play a key role in IT development & implementation of projects. Here you are able to customize, test, train key-users and act as project manager.

Role and responsibilities

Responsibilities:

- Challenging the business requirements and processes in order to realize a fit in standard IT solutions (mainly SAP) instead of custom build;
- Translating business requirements into the right functional IT specifications and IT solution direction. This means you create the Functional Design and contribute to the architectural roadmap;
- Testing delivered functionalities in SAP ME/MII;
- Managing Non Standard Changes in your area from Intake till Go Live & Hand-over to support.

Are you getting energized by managing many divers IT solutions for our internal customers? This is the job you're looking for!

Education and experience

Education

Bachelor or a Master Degree in Information Technology or Business Administration.

Experience

Are you the Business Process consultant with:

- Affinity with manufacturing processes in a high tech complex environment.
- Ability to document "as is" and "to be" processes and to assist development of business case transition.
- Experience in translation of Business requirements into IT requirements; and select or design the correct solution (direction) corresponding these business requirements.
- Knowledge of IT systems supporting logistic and manufacturing processes
- SAP ECC/PP/SAP-ME/SAP-MII/SAP PCo
- Experience with interfacing (incl. non-SAP systems).
- Detailed hands-on / customizing knowledge of SAP ECC is a must;
- Interest in complex large high-tech industry or manufacturing organizations is a must

Skills

Working at the cutting edge of tech, you'll always have new challenges and new problems to solve – and working together is the only way to do that. You won't work in a silo. Instead, you'll be part of a creative, dynamic work environment where you'll collaborate with supportive colleagues. There is always space for creative and unique points of view. You'll have the flexibility and trust to choose how best to tackle tasks and solve problems.

To thrive in this job, you'll need the following skills:

Personal Skills

As SAP MES consultant you recognize yourself at least in the following competences:

- Strong customer focus, result-oriented and drive for excellence;
- Excellent communication skills in English, preferable in Dutch;
- Eager and willingness to learn;
- Proactive and enthusiastic;
- Able to deal with resistance;

- Ability to influence without power;
- A demonstrated ability to perform in high-pressure environments;
- Well-developed consultancy skills with a strong go-getter mentality including willingness to perform hands-on activities;
- Able to maneuver through different cultures.

Diversity & Inclusion

ASML is an Equal Opportunity Employer that values and respects the importance of a diverse and inclusive workforce. It is the policy of the company to recruit, hire, train and promote persons in all job titles without regard to race, color, religion, sex, age, national origin, veteran status, disability, sexual orientation, or gender identity. We recognize that diversity and inclusion is a driving force in the success of our company.

Other information

Context of the position

ASML IT. The IT sector supports information management, infrastructure and key business processes across ASML. The ICT infrastructure, hardware and applications are absolutely mission-critical for almost all ASML's internal and external activities.

A sub-department within the IT organization is IT Solution Delivery Operations. This Competence Center is responsible for providing the right IT systems for the core business processes of Operations (Manufacturing, Logistics, Central Planning, Sourcing, Quality & Process Improvements, Customer Service and Facility Management). Customers of this department are internal customers, whose goal is to provide world class systems and services for all major chip makers around the world, and who therefore need the best tools available.
