## Rolomschrijving en taakafspraken

### Introduction to the job

ASML – the world's leading provider of lithography systems for the semiconductor industry

### Job Mission

Be the linking pin between the ASML Logistics organization, the IT organization and outsourcing partners (Logistics and IT). Assess, change/refine and implement business processes and related information systems (SAP/MM/MM/EWM, and non-SAP systems) to continuously increase their effectiveness and make sure that they are properly aligned with the company's strategic direction.

### Role and responsibilities

- The consultant acts as a first IT contact for Business key players and Business process owners in the ASML organization (Manufacturing & Logistics departments).

- As a consultant you assess, change and define/refine business processes and related information systems (a.o. SAP) to continuously increase their effectiveness and ensure they are properly aligned with the company's strategic direction.
- Play key-role in IT development & implementation projects (esp. SAP), manage transition from projects (new developments) to support phase (run and maintain) by checking all documentation and knowledge transfer by the project teams before go-live.
- You are the link between the ASML business organization, the ASML/IT organization and outsourcing partners. (both Logistics (3PL) and IT).

#### Education and experience

##### Education:

- Bachelor's or Master's degree in Information Technology or Business Administration

##### Experience:

- Five to ten years of experience with logistic processes in a high tech complex environment.
- Ability to document "as is" and "to be" processes and to assist development of business case transition.
- Experience in translation of Business requirements into IT requirements; and select or design the correct solution (direction) corresponding these business requirements.
- Detailed knowledge of IT systems supporting Logistic processes
  - Experience with SAP/MM/MM/EWM is a pre
  - Experience with S4HANA is a pre
  - Experience with 3PL interfacing (incl. non-SAP systems) is a pre.

#### Skills

Working at the cutting edge of tech, you'll always have new challenges and new problems to solve – and working together is the only way to do that. You won't work in a silo. Instead, you'll be part of a creative, dynamic work environment where you'll collaborate with supportive colleagues. There is always space for creative and unique points of view. You'll have the flexibility and trust to choose how best to tackle tasks and solve problems.

To thrive in this job, you'll need the following skills:

- Strong customer focus, result-orientation, and commitment to excellence;
- Pro-active personality who can deal with resistance;
- Leadership capability, responsibility and authority, ability to steer a team
- A demonstrated ability to perform in high-pressure environments;
- Well-developed consultancy skills combined with hands-on mentality, and a strong go-getter mentality;
- Passionate about driving innovative solutions;
- Motivated and enthusiastic team player;
- Strong communication and presentation skills
- Fluent in Dutch and/or the English language.

#### Diversity & Inclusion

ASML is an Equal Opportunity Employer that values and respects the importance of a diverse and inclusive workforce. It is the policy of the company to recruit, hire, train and promote persons in all job titles without regard to race, color, religion, sex, age, national origin, veteran status, disability, sexual orientation, or gender identity. We recognize that diversity and inclusion is a driving force in the success of our company.

## Other information

### Context of the position:

The consultant is working within the IT Competence Center Operations/domain Logistics, reporting to the Solution Team Manager. In this domain we capture and fulfill IT demand from sector Logistics, and provide technology through large-scale projects or changes to our existing application infrastructure.
