Uren per week	40 uren per week
Looptijd	01.01.2023 - 02.01.2025
Opdrachtnummer	124133
Sluitingstijd	02.01.2025

## Rolomschrijving en taakafspraken

### Introduction to the job

ASML is the world's leading provider of lithography systems for the semiconductor industry, manufacturing complex machines that are critical to the production of integrated circuits or chips. Our purpose is “unlocking the potential of people and society by pushing technology to new limits”. We do this guided by the principles “Challenge”, “Collaborate” and “Care”.

### Domain

We value openness, transparency and professionalism and we're looking for a result-oriented developer/consultant with a growth mindset and focus on quality.

### Role and responsibilities

This role is situated in the Big Data Analytics (BDA) Domain. Our teams have mixture of young talent and senior specialists and have a strong focus on

delivering business value for our stakeholders. In addition, we work in the Scaled Agile Framework 5.0.

#### Team

In this role you will be positioned in one of the teams within our Corporate Analytics Hub department. This Agile Release Train operates and delivers various analytics applications and solutions to our corporate sectors (i.e. HR, marketing, sales, communications, IT etc).

In your daily activities you will be closely aligned with your peer engineers/developers, our solution architects and teams that are responsible for building the technical integration.

#### Goal

As HANA Cloud developer your main task is to analyze, design and implement data models and related procedures in HANA Cloud, realizing our product backlog as defined by one of our Product Owners.

Next to the development we expect you to own your solution by making sure it's optimized and the quality is assured.

You will be using multiple integrated systems, so you'll help organize the interfaces together with the integration team and your system architect.

#### Education and experience

##### Education & training

- Bachelor degree or higher
- SAP Certified Application Associate - SAP HANA Cloud Modeling (training and/or certification)

##### Experience:

- You should have at least 5 years (or more) of working experience in the field of business intelligence or business analytics.
- Experience with developing using GIT based HANA automated deployment pipelines

#### Skills

Working at the cutting edge of tech, you'll always have new challenges and new problems to solve – and working together is the only way to do that. You won't work in a silo. Instead, you'll be part of a creative, dynamic work environment where you'll collaborate with supportive colleagues. There is always space for creative and unique points of view. You'll have the flexibility and trust to choose how best to tackle tasks and solve problems.

To thrive in this job, you'll need the following skills:

##### Technical skills:

- Excellent understanding of SAP HANA (2.0 / Cloud), Data Modelling and writing procedures
- Knowledge of SQL
- CAP (SAP Cloud Application Programming Model), specifically NodeJS (for our source data API's)
- Experience with developing using GIT based HANA automated deployment pipelines
- Knowledge of OData / REST services
- Basic Spotfire skills

##### Non-technical Skills:

- Fluent in English
- Pro-active / self-starter
- Communicative (e.g. during the daily and/or when requirements are fleshed out in refinement sessions)

- Managing stakeholders
- Team player

#### Diversity & Inclusion

ASML is an Equal Opportunity Employer that values and respects the importance of a diverse and inclusive workforce. It is the policy of the company to recruit, hire, train and promote persons in all job titles without regard to race, color, religion, sex, age, national origin, veteran status, disability, sexual orientation, or gender identity. We recognize that diversity and inclusion is a driving force in the success of our company.
