Rolomschrijving en taakafspraken

Description:

As a Senior Developer SAP Commerce you'll be member of a squad that is responsible for building and deploying end to end IT solutions for business and markets. In addition, you will act as a servant leader for this squad. Delivering highly qualitative application must be in your DNA!

We're on the lookout for forward-thinking innovators with a passion for sustainability. If you match this description, get in touch!

What you'll do

- You'll contribute technical knowledge and skills to the squad, ensuring solutions of high technical standard and that the Products in scope run smooth technically.
- You'll take care of people on the human aspects as well as their professional development by coaching, providing feedback, mentoring, creating growth-opportunities and preventing people to stay too long in their comfort zone. Facilitates resolution of issues between Squad Team members.

- You'll lead by example in squad effectiveness, efficiency, continuous improvement and quality of work at daily stand-ups.
- You'll make sure that continuous improvement programs are executed according to plan.
- You'll collaborate with Product Owner and other agile team members to craft clear user stories, design tests for prototypes and products, and continuously deliver product enhancements in sprints.

Your qualifications

- You've a master's degree in technology (or equivalent).
- You've minimum 10 years of relevant experience.
- You're fluent in English and you have excellent communication skills.
- You've been a lead developer in the SAP Commerce (configuration & development) including API framework (OCC), JAVA Language, Spring framework.
- You've generic knowledge about development tools like Github and Jenkins.
