Web app developer

Functie	Web app developer
Locatie	Eindhoven
Uren per week	36 uren per week
Looptijd	25.09.2022 - 24.09.2023
Opdrachtnummer	114137
Sluitingstijd	24.09.2023

Rolomschrijving en taakafspraken

Inzetten bij Defensie zijn doorgaans voor langere tijd (1 tot maximaal 4 jaar). Voor deze functie moet een B- screening worden doorlopen met een gemiddelde duur van 6-8 weken.

Opdrachtbeschrijving

The web application developer to hire is responsible for permanent code generation wrt to MEAT NG development. This includes the practical implementation of customer triggered software change requests as pieces of software code as well as pieces of code aimed for maintaining MEAT NG-as-a-software (3rd level support). By doing so, he or she mainly contributes to ensure that MEAT NG as a software is properly developed and fulfills the expectations of the customers out of 7 participating nations.

The described post holder works as software developer and is part of a mixed team (civilian and military personnel).

The main tasks are:

- + transfer software change request tasks into pieces of code using the programming languages and tools in use for the development of MEAT NG wrt:
 - application functionalities.
 - application interfaces.
 - built-in reports.
 - database objects (tables, views, constraints and sequences, PL/SQL packages, functions, procedures and triggers).
- + reviews generated code.
- + tests generated code for functionality/ usability.
- + supports superior officers permanently by:
 - developing a detailed estimate for each assignment.
 - contributing to the management of the internal product backlog.
 - providing 3rd level service desk duties for MEAT NG to EATC's participating nations.

Working language: English: Reading (Good) + Writing (Good) + Speaking (Good) + Listen (Good).

Achtergrond opdracht
